Application Serial No.: 10/677,918  
Response to Office Action  
Transmission Date: August 8, 2008

**II. Amendments to the Specification:**

Please note that when the original patent application was filed, the USPTO form PTO/SB/05 – “Utility Patent Application Transmittal” indicated the following title: “Single Plate Polynucleotide Preparation”. However, the cover page of the application  
5 indicated the following title: “High Throughput Sample Preparation”.

Please amend the above-referenced application--as necessary--to indicate the following correct title: “High Throughput Sample Preparation”.
